

Application Serial No. 10/568,209
Amendment

PATENT
Docket: CU-4693

REMARKS

In the claims, please amend claims 72 and 92 by removing the feature "a pump located in the recess, the pump being in fluid communication with the elongated body." No new matter is added by way of this amendment. In addition, please add this removed feature to new claim 93. The amendments to the claims can be viewed in the Amendments section in the Listing of claims beginning on page 2 of this paper.

Counsel for the Applicant spoke with the Examiner Wednesday February 17, 2010. The Examiner requested that the amendment be submitted in a 1.312 amendment paper and should be allowable depending on the wording of the amendment. The Applicant has, as discussed, only removed the last feature from the claims.

The Applicant respectfully submits that this application should still be in condition for allowance and respectfully requests favorable consideration.

Respectfully submitted,

2-18-2010
